

Instructions for Connecting to new Student Wireless System

G. Holmes Braddock Senior High

Any staff member wanting to connect to the staff Wi-Fi system must use the following instructions:

1. Initial set-up for staff wireless system. Staff will click on "BULLDOGS PUPS" which will prompt students to password screen.
2. Students will type in the password "BullDog\$" and click "OK" to initially log into the Wi-Fi system. (CAP sensitive)
3. Once the initial login has taken affect, students will need to go to the internet browser. There, they will be directed to login using their school credentials. Username (participate\ID #) and password.
4. The school login credential will allow the connection to the Wi-Fi system. If you do not use your school credential login information, you will not be connected to the Wi-Fi system.

Once the device has left the range of the wireless system signal, connectivity will be lost and login (step 3) must take place again using the school credential login. This will be done by clicking on the internet browser for your device.

*All access to the school wireless system is subject to all normal filters established by ITS.
